

Dear Clinton Residents:

We are asking for your assistance in helping to bring broadband internet into our community. Part of the grant application is to basically prove that we have a need for it throughout our community. Below is a link provided as part of the process that is used to map out actual high speed internet availability in a specific location. It takes approximately one minute to complete. The speed test reads at the location it is ran, so please perform it at your actual residence, workplace or any property you have in Clinton or in East Feliciana Parish where you know the address. We need to cover as many points throughout the parish and town as possible. Feel free to explore the site first if you are skeptical. You are not required to put in any information other than the location the test is being performed. This is a vital part of the application, and any assistance is greatly appreciated. Please share this and help get it to those not on social media as well.
